BASIS Conference

17th May 2022

Morning Session

Times	Content	
0915-1000	Registration and coffee in exhibition area	
0950-1000	Enter main stage area	
	EARLY MORNING SESSION – Chair Russell Seymour	
1000-1015	Welcome and introduction Dr Russell Seymour, CEO, BASIS	
1015-1045	Keynote 1: Sustainable Practice for Transformative Action: Lessons from 30 Years of Regenerative Learning at Schumacher College Dr Pavel Cenkl, Head of Schumacher College and Director of Learning at Dartington Trust	
1045-1115	Panel 1: Setting the Scene: The Climate and Ecological Emergency. Prof Mike Bruford, Dean of Environmental Sustainability at Cardiff University Paula Chin, Sustainable Materials Specialist, WWF Prof Mark Maslin, Professor of Earth System Science, UCL (via Zoom)	
1115-1140	Coffee Break and Networking	
	LATE MORNING PLENARY – Chair Sally Cornelius, BASIS Executive	LATE MORNING WORKSHOPS – Convenors as listed below
1140-1200	Presentation 1: Staying Green in an Energy Crisis needn’t cost the Earth Alex Dovey, Commercial Director, Professional Energy Services	Workshop 1: Sustainable Sports Surfaces: What can we do to make artificial and natural sports surfaces more sustainable? Niall MacPhee, Associate Director, Sports Labs Ltd Workshop 2: Sustainability, Cricket Gear and Clothing: New research and insights Prof Martin Charter, Director of the Centre for Sustainable Design, University for the Creative Arts Joanna Czutkowna, PhD Candidate, UCA
1200-1220	Presentation 2: Planning and Delivering “The Greener Game” Caroline Carlin, Operations and Sustainability Manager, Southampton FC Mike Lloyd, Sustainability and Logistics Manager, Arsenal FC	
1220-1240	Presentation 3: Driving Sustainability through Motorsport Jessica Runicles, Head of Sustainability, Motorsport UK	
1240-1350	LUNCH and networking (food to be available through to 14:00) Opportunity for sport or topic specific groups to meet informally in boxes if there is interest.	

British Association for Sustainable Sport

BASIS Conference

17th May 2022

Afternoon Session

Times	Content
1350-1400	Reconvene in the main space
	AFTERNOON SESSION – Chair Sarah Peasey, Director of European ESG Investing, Neuberger Berman and BASIS Independent Board Member.
1400-1410	Keynote 2: The Athlete Imperative – Perspectives on Sustainability and Sport Laura Baldwin, Olympic sailor and two-times Olympic sailing coach. Current National Champion.
1410-1430	Presentation 4: UNFCCC Sport for Climate Action Led by Dan Reading, Head of Sustainability at Right Formula, former Head of Sustainability at World Sailing and Co-Chair of the UNFCCC Sports for Climate Action Framework Phil Horton, Head of Sustainability, The Royal Yachting Association Hattie Park, Sustainability Manager, All England Lawn Tennis Club
1430-1450	Presentation 5: Sustainability at global events – large and small: the Birmingham 2022 Commonwealth Games and the World Coastal Rowing Championships 2022 Jessica Fidler, Head of Sustainability, Birmingham 2022 Commonwealth Games Joanna Leigh, Sustainability Coordinator, Birmingham 2022 Commonwealth Games Rachel Dulai, Event Director, World Coastal Rowing Championships 2022
1450-1535	Panel 2: Talking rubbish - Managing waste food and packaging Led by Amanda Curtis, AC Sustainable Futures Adam Read, Head of External Affairs at Suez and President of the Chartered Institute of Waste Management Kevin Watson, Business Director and Net Zero Lead for Levy UK&I Mark Game, The Bread and Butter Thing
1535-1620	Panel 3: Engaging with Sports Audiences Led by Claire Poole, Founder and CEO, Sport Positive Helen Falkus, Director of Multi Sports at Sky David Lockwood, Editorial Lead for Sustainability, BBC Sport Henry Wilks, Co-founder, Shoot the Company
1620-1630	Closing remarks Dr Russell Seymour, CEO, BASIS
1630	Main Conference Closes
1630-1730	Venue Tour Darren Crossman, Facilities and Safety Manager, Principality Stadium <u>Requires pre-booking – 30 spaces available</u>

The Schedule may be subject to change.

British Association for Sustainable Sport

BASIS Conference

17th May 2022

Session Details

EARLY MORNING SESSION

Chaired by Russell Seymour, CEO, BASIS

Welcome and introduction

Dr Russell Seymour, CEO BASIS

Time: 10:00 to 10:15

BASIS CEO to welcome delegates to this years' BASIS Conference and outline the day.

Keynote 1: Sustainable Practice for Transformative Action: Lessons from 30 Years of Regenerative Learning at Schumacher College

Time: 10:15 to 10:45

Dr Pavel Cenkl, Head of Schumacher College and Director of Learning at Dartington Trust

Pavel has been at the forefront of progressive higher education for more than 20 years and has brought together a passion for athletics as an endurance runner with expertise in humanities and ecological thinking to help drive transformative change in the US and UK. Pavel will share how his experiences across community learning, ecological thinking, and sustainability could serve as a model for engaging in transformative action across sports.

Panel 1: Setting the Scene: The Climate and Ecological Emergency – recent developments

Prof Mike Bruford, Dean of Environmental Sustainability at Cardiff University

Paula Chin, Sustainable Materials Specialist, WWF

Prof Mark Maslin, Professor of Earth System Science, UCL

Time: 10:45 to 11:15

The session will provide a summary of the current state of the environment. Human activities are disrupting the natural processes that support society and the natural systems that support us. This session will review some of the biggest threats that face us, and the actions that we, as individuals and organisations, can take to mitigate the impacts. The panel will discuss recent developments around climate change, biodiversity and plastic waste including IPCC reports published since COP26 Climate Change, the expectations for COP15 Biodiversity and plans for an international treaty on plastics. The panel will discuss the implications for sport.

LATE MORNING SESSION

Plenary chaired by Sally Cornelius, BASIS Executive.

Note that Workshops run concurrently in breakout rooms.

Presentation 1: Staying Green in an Energy Crisis needn't cost the Earth

Alex Dovey, Commercial Director, Professional Energy Services

Time: 11:40 to 12:00

Not only are we in a climate and ecological emergency, but we now have a cost-of-living crisis that is impacting on people's lives and business running costs. How can sports clubs and venues, who want to reduce their impacts but also need to control costs, respond? Alex Dovey is an expert in energy markets and procurement. In this talk he will discuss renewable energy solutions, zero- and low-carbon options and the technologies that are available.

Presentation 2: Planning and delivering "The Greener Game"

Caroline Carlin, Operations and Sustainability Manager, Southampton FC

Mike Lloyd, Sustainability and Logistics Manager, Arsenal FC

Time: 12:00 to 12:20

On 16th April Southampton hosted Arsenal at St Mary's for the inaugural "Greener Game". While all Premier League matches are important this one had greater significance by raising the issue of environmental sustainability. The Saints have become well known for their "Halo Effect" sustainability policy, while the Gunners have had a long-standing focus on more sustainable operations, and both ranked highly in this year's EPL Sustainability Table, but this is the first time they have come together to plan and deliver a match with fan-focussed messaging and initiatives on sustainability issues and solutions. Caroline and Mike will discuss some of the actions taken and the responses of the fans to "The Greener Game".

Presentation 3: Driving Sustainability through Motorsport

Jessica Runicles, Head of Sustainability, Motorsport UK

Time: 12:20 to 12:40

Motorsport UK will talk about their role as a governing body in supporting the wider sport to be more environmentally sustainable and inclusive. Focusing on how they got started on their sustainability journey, the early days to current priorities and future workplans. Exploring additionally how they are engaging key external stakeholders to create change.

British Association for Sustainable Sport

Workshop 1: Sustainable Sports Surfaces: What can we do to make artificial and natural sports surfaces more sustainable?

Niall MacPhee, Associate Director, Sports Labs Ltd

Colin Corline, Project Manager, Sport and Play Construction Association

Dr Iain James, Head of Facilities Services, ECB

Matt Le Brun, Business Development Manager, Advance Grass

Time: 11:40 to 12:40

Sport at all levels is now played on natural and/or artificial surfaces. Elite ball sports such as Cricket, Football, Golf and Rugby rely on carefully curated natural turf surfaces which are increasingly dependent on the latest technology in machinery and growing agents to cope with the demands placed on it by rising demand for fixtures. How do we prove that improved performance can be achieved by more sustainable practice through objective data?

Artificial surfaces provide recreational and increasingly elite sport with the benefits of increased usage with less maintenance required and with performance characteristics which can replicate natural turf, but at what cost? Does society benefit from the accessibility of sporting facilities dependent on artificial surfaces to increase participation and the advantages that delivers in better health outcomes?

We will be using case studies from leading sports venues in the UK to discuss and analyse these differing constituencies and examine how the understanding of sustainability is woven into them

Workshop 2: Sustainability, Cricket Gear and Clothing: New research and insights

Prof Martin Charter, Director of the Centre for Sustainable Design, University for the Creative Arts

Joanna Czutkowna, PhD Candidate, UCA

Time: 11:40 to 12:40

The workshop is to share the interim findings from two studies exploring sustainability - and particular circularity - in relation to cricket equipment and clothing. The insight from these interim findings will surprise and perhaps resonate with many people involved in the sustainable sportswear and equipment sector across all sports.

The session will offer an opportunity to compare and share experiences from other sports sectors as well, to understand how other sports sectors are tackling circularity in equipment and clothing procurement frameworks, reuse, repairs and recycling, as well, the use of new sustainable materials.

A Group Discussion will be led by Professor Martin Charter, Director, The Centre for Sustainable Design, University for the Creative Arts and Joanna Czutkowna, PhD Candidate, CfSD, BSCI, UCA to facilitate a discussion amongst participants

British Association for Sustainable Sport

- Do you have experience of circularity issues e.g. reuse, repair and recycling in cricket equipment and clothing? If so, do you have any insights to share?
 - How is sustainability considered during the procurement process for clothing and equipment? e.g. are there sustainability criteria and weightings included in tenders and evaluation?
 - Does your organisation use any sustainability frameworks, guidelines or checklists to help make decisions related to procuring equipment and clothing?
 - Are there examples of reuse, repair, refurbishment and recycling within your sport?
 - Are renewable and recycled fibres used in clothing in your sector at a professional or amateur level?
 - What happens to sports clothing in England and Wales at the end of its 1st life? Does most of it go to community recycling banks and/or to landfill?
-

AFTERNOON SESSION

Chaired by Sarah Peasey, Director of European ESG Investing, Neuberger Berman and BASIS Independent Board Member

Keynote 2: The Athlete Imperative – Perspectives on Sustainability and Sport

Laura Baldwin, Olympic sailor and two-times Olympic sailing coach. Current National Champion.

Time: 14:00 to 14:10

Laura Baldwin is a successful elite athlete and coach. More recently she has become an environmental activist and advocate and recognises the potential for sport to unite, engage and excite. We hear Laura's perspective on how, and perhaps why, sport can and should play an active role in developing social and ecological awareness

Presentation 4: UNFCCC Sport for Climate Action

Led by Dan Reading, Head of Sustainability at Right Formula, former Head of Sustainability at World Sailing and Co-Chair of the UNFCCC Sports for Climate Action Framework

Phil Horton, Environment and Sustainability Manager, The Royal Yachting Association

Hattie Park, Sustainability Manager, All England Lawn Tennis Club

Time: 14:10 to 14:30

British Association for Sustainable Sport

The UNFCCC Sport for Climate Action Framework now requires signatories to measure a baseline carbon footprint, set targets and report on carbon emissions. Dan Reading, Co-Chair of the S4CA framework, will discuss the framework and the recent changes that have been made. He will discuss what is required of signatories and we will hear from the All England Lawn Tennis Club and the Royal Yachting Association about their experience reporting for the first time against the new structure.

Presentation 5: Sustainability at major events: the Birmingham 2022 Commonwealth Games and World Coastal Rowing Championships

Jessica Fidler, Head of Sustainability, Birmingham 2022 Commonwealth Games

Joanna Leigh, Sustainability Coordinator, Birmingham 2022 Commonwealth Games

Rachel Dulai, Event Director, World Coastal Rowing Championships 2022

Time: 14:30 to 14:50

In this session we will hear from two global events that are taking place in the UK this year. Sustainability issues impact on all sports events, large and small. The Commonwealth Games is one of the biggest multi-sport events in the world attracting competitors from around 70 countries in 26 sports for 12 days and in 16 venues centred on Birmingham, but including venues in other towns and cities across the midlands and even London. Birmingham 2022 will integrate para-sports into the main games for the first time. The World Rowing Coastal Championships is smaller event focussed on sea rowing across ten-days in Saundersfoot, Pembrokeshire. Both have strong sustainability goals and targets. We will hear from those leading and implementing the sustainability programmes of both events highlighting key initiatives and demonstrating how they are implementing sustainability principles into their events.

Panel 2: Talking rubbish - Managing waste food and packaging

Led by Amanda Curtis, AC Sustainable Futures

Adam Read, Head of External Affairs at Suez and President of the Chartered Institute of Waste Management

Kevin Watson, Business Director and Net Zero Lead for Levy UK&I

Mark Game, The Bread and Butter Thing

Time: 14:50 to 15:35

This panel brings together industry experts to discuss how to manage waste operational waste from events, with a focus on catering waste. Catering waste can often be largest proportion of the waste generated by events and often involves significant amounts of packaging. Food waste is a potential contaminant of other waste streams. How do we minimise the impact of operational waste from catering and hospitality and what do we do with unused food?

British Association for Sustainable Sport

Panel 3: Engaging with Sports Audiences

Led by Claire Poole, Founder and CEO, Sport Positive

Helen Falkus, Director of Multi Sports at Sky

David Lockwood, Editorial Lead for Sustainability, BBC Sport

Henry Wilks, Co-founder, Shoot the Company

Time: 15:35 to 16:20

Sport has a powerful opportunity to connect with participants, spectators and fans. In this session we will hear from broadcasters, journalists and film-makers about how sport can engage with different audiences in different ways to tell our sustainability stories, inspire people to take action and make genuine change. Sky have a long-standing commitment to sustainability and have started to include sustainability messaging into their sports delivery and reporting, BBC Sport report on sustainability stories as they relate to and impact on sport, while award-winning documentary makers, Shoot the Company, help sports brands to tell their stories in an impactful way. How we tell our stories can be as important as the action itself as engaging story-telling can magnify the impact throughout society.

Closing remarks

Dr Russell Seymour, CEO, BASIS

Time: 16:20 to 16:30

Venue Tour - Requires pre-booking – 30 spaces available

Darren Crossman, Facilities and Safety Manager, Principality Stadium

Time: 16:30 to 17:30

British Association for Sustainable Sport

BASIS Conference

17th May 2022

Speaker Biographies and Photographs

EARLY MORNING SESSION

Dr Russell Seymour – BASIS

Russell Seymour is a pioneer in Sustainability and Sport in the UK. With an academic background, Russell started work in the sports sector through a convoluted career path. He soon realized that the sport sector had significant environmental impacts, was being impacted by environmental changes and, importantly, had an opportunity to raise awareness as a trusted, non-partisan ambassador by using the powerful influence of sport on participants and fans. With this in mind, he set up BASIS (the British Association for Sustainable Sport) in 2010, with the intention of bringing together like-minded individuals at all levels of sport, to share ideas, experiences and strategies around sustainability.

Russell is a visiting lecturer at Loughborough University and at the University of Greenwich, he sits on the British Standards committee SCP/1 on Sustainable Performance, Consumption and Production and is a member of the Advisory Board for the Sport Ecology Group.

Dr Pavel Cenkl – Schumacher College

Dr Pavel Cenkl is Head of Schumacher College and Director of Learning at Dartington Trust in Devon, England, where he has worked since 2019 to support an evolving learning community founded at the intersection of arts, ecology and social justice. Pavel has written and presented widely in the areas of curriculum design, pedagogy, environmental humanities and ecology. He is also an endurance athlete and has completed numerous long-distance runs as part of his Climate Run project to draw attention our relationship with the more-than-human world at the intersection of movement, ecology, and climate change. His most recent book, with Satish Kumar, is [Transformative Learning: Reflections on 30 Years of Head, Heart, and Hands at Schumacher College](#) (2021).

Empowering sport in the UK
to become a world leader in
sustainability

Professor Mike Bruford – Cardiff University

Mike Bruford is Professor of Biodiversity and Dean for Environmental Sustainability at Cardiff University, with University-wide remit for helping the University achieve its plans stemming from its climate emergency declaration in 2019, including its drive towards carbon net zero status for Scopes 1 and 2 by 2030 for Scope 3 as soon as possible thereafter. In 2020 his team produced the University's first climate emergency white paper and Ecosystem Resilience and Biodiversity Action Plan (ERBAP).

Professor Mark Maslin – University College London

Mark is Professor of Earth System Science at UCL. His expertise includes causes of past and future global climate change. He works on potential decarbonisation solutions and the politics of climate change. His book "How to

Save Our Planet: The Facts" was published by Penguin in May 2021, in which he provides solutions at the individual, corporate, Government and international levels. He appears regularly on radio and television (including BBC, ITV, Sky, Channel 4, CNN, Euronews, Nat Geo and Discovery) and has written articles for outlets including the New Scientist, the New York Times, the Times, FT and the Guardian. He is the UCL designated point of contact for the UNFCCC negotiations.

Paula Chin – WWF-UK

Paula is a Senior Policy Adviser for Consumption at WWF-UK. Following 20 years in industry she joined WWF in 2019. She provides internal and external technical expertise on materials-related issues including plastics, with her policy and advocacy work focusing more broadly on resources, waste and circular economy thinking. As WWF's Sustainable Materials Specialist, she is involved in policy thinking relating to wider resources and waste issues including a global treaty to combat plastic pollution, supporting a shift to a circular economy and advocating for ambitious domestic policy measures to tackle the impacts of resource consumption. She is the current chair of the Wildlife and Countryside Link's Resources and Waste Working Group and sits on several advisory groups including UKRI's Smart Sustainable Plastic Packaging Advisory Group and the IGD's Sustainable Packaging Systems initiative.

Sally Cornelius – The Happy Ocean Company and BASIS Membership Director

For the past 25 years, Sally has been supporting businesses in their development, driving change through her energy and passion. Sally set up her first business in 2006 and is part of number of different business ventures that support organisations in their sustainability journeys. She joined the BASIS Executive team in 2021

Alex Dovey – Professional Energy Services

Alex is the owner and Commercial Director of Professional Energy Services. He has been assisting all types of organisation with the procurement and management of sustainable energy for over 15 years with a focus on renewable sourcing and NetZero strategies.

Caroline Carlin – Southampton Football Club

Caroline joined Southampton Football Club in 2018 and in her role as Operations and Sustainability Manager has been instrumental in the development and launch of the club's sustainability strategy 'The Halo Effect', making company-wide improvements across four key pillars - Environmental Responsibility, Corporate Responsibility, Fan Responsibility and Social Responsibility – with the club being recognised for its progress in becoming more environmentally sustainable by rising to 3rd place in the 2021 Premier League Sustainability table. Through developing The Halo Effect, Caroline has become an active member in sports sustainability networks in the UK and was recently appointed to the Management Board at The British Association for Sustainable Sport.

Mike Lloyd – Arsenal Football Club

Having worked within the football industry for over 20 years, I have seen a lot of changes. Sustainability has been slowly rising in importance and it is now being talked about at the senior level that it deserves. Coming from a background of Facilities management, it is interesting to see the changes in opinion and focus.

Niall MacPhee - Sports Labs Group

Niall has been working in the sports sector for 15 years since leaving university as a Sports Engineer certifying sports surfaces to international governing body standards such as FIFA, World Rugby, FIH, World Athletic, and ITF. His role as Associate Director in the Sports Labs Group sees him oversee new business development and technological integration for test method, and test equipment. Sustainability and environmental considerations are part of many live Sports Labs projects.

Jessica Runicles – Motorsport UK

Jessica is the Head of Sustainability at Motorsport UK with responsibility for progressing the sustainability strategy across social and environmental issues. She joined motorsport UK from BITC where she led the formation of BITC's consultancy offering across Strategy and Purpose, Wellbeing, Inclusion, Community and Environment. Her 12 years in the sector also saw her create the Responsible Business Map and develop the Responsible Business Tracker.

Dr Iain James – England and Wales Cricket Board

Iain is Head of Facilities Services at the England and Wales Cricket Board and leads a team responsible for advising the professional and recreational game on cost-effective, sustainable and safe investment in facilities and infrastructure. Iain was Technical Director

at the sports surface design consultancy TGMS Ltd and formerly a Senior Lecturer at Cranfield University. He has published a number of books and articles, including on the sustainable design and management of sports surfaces.

Matthew Le Brun – Advance Grass Solutions

With experience ranging from on the tools, an NPTC Trainer/Assessor in Machinery to having spent the last 7 years working with a range of High-Profile National Accounts. Delivering leading results from National Stadiums, throughout The Football League, International Cricket/Tennis venues, European Tour Golf facilities, Universities/Schools and across the Grass roots system in the UK.

This includes successful Grow ins with Concerts/Boxing/Events, developing leading bespoke nutritional plans - to long term strategies for improvements on a national level with a core focus on sustainability. Annually accruing tens of thousands agronomical data points per year across various constructions. A focus on additional added support, Full pitch/course assessments, bespoke research studies, product development and educational events. Keeping AGS on the cutting edge of technology and continuing to develop our industry forward. A clear passion to deliver the best possible surfaces and added value support.

Colin Corline – SAPCA

Colin has worked within the sports construction industry for the past 25 years overseeing the design, funding, project management and testing of indoor and outdoor sports facilities across several sports in the UK and around the world.

At Material Science Consultants Colin spent 12 years overseeing the construction and testing of over 200 sports facilities from design stage to delivery in collaboration with NGB's around the world. Career highlights include the hockey facilities for the 2002 Commonwealth Games, the athletics stadium track for the 2007 World Championships in Osaka and a ground-breaking hockey facility for the US Hockey Association in Virginia Beach. At the Lawn Tennis Association Colin spent 11 years working within the Facilities Team overseeing the development, funding and delivery of 150 projects across the south of England and Wales. In this role Colin also led the strategic development of 10 indoor tennis facilities. At SAPCA Colin has spent the past 3 years overseeing the association's Technical Programme developing new guidance and technical standards for the UK sports construction industry, representing the association on both CEN and BSI committees and enhancing and delivering SAPCA's Quality System.

Sustainable sport can build a better future for all

Professor Martin Charter – University for the Creative Arts (UCA)

Professor Martin Charter is the Founding Director of The Centre for Sustainable Design® at the University for the Creative Arts (UCA) that was established in 1995. Martin is also a member of the Senior Management Team, UCA Business School for the Creative Industries. He is a former Visiting Professor in Sustainable Product Design at UCA and presently Professor of Innovation & Sustainability at UCA. Martin has 30 years' experience in business sustainability with particular expertise in sustainable innovation, product sustainability and circular economy and has been an author and editor of many reports and publications including Sustainable Solutions, Greener Marketing I & II, and Designing for the Circular Economy. He has also been active in international and national standardisation in eco-design and circular economy both as a convenor and expert. Martin is the founder and organiser of the Sustainable Innovation series of international conferences. He is a regular speaker at conferences worldwide and has sat on a range of advisory groups. Martin founded and is the chair of the charity Farnham Repair Café.

Empowering sport in the UK to become a world leader in sustainability

Joanna Czutkowna – Independent Consultant

Joanna is an independent consultant specialising in clothing circularity. With over 20 years' experience working globally with major brands and manufacturers she brings practical insights from every part of the product development and production process. She is a part of ISO/TC 323/WG 2 contributing to practical approaches to develop and implement circular economy and is a B Corp Pending company. She is currently also a PhD Candidate researching circularity in cricket clothing with the Centre for Sustainable Design at the University for Creative Arts. More information about Joanna and her company I went shopping today can be found at <https://iwentshoppingtoday.com/>

Sustainable sport can build a better future for all

Sarah Peasey – Neuberger Berman and BASIS Board Member

Sarah is the Director of European ESG Investing for Neuberger Berman. She leads ESG integration and client engagement across Europe, working with investment teams and analysts in the region to advance Neuberger Berman's ESG capabilities. Sarah holds a first-class degree in business management from the University of East Anglia and brings sustainable finance expertise, with a background in risk management, investments, engagement, product design and process integration. In her roles within the asset management industry she has worked closely on the integration of sustainability factors into investment design-making processes, designing investment product to incorporate sustainability themes, and engaging directly with companies to improve sustainable practises. More recently, Sarah has worked on designing climate risk and temperature alignment modelling, whilst also working closely with the UK debt management office and the Bank of England in the recent issuance of the inaugural "Green Gilt".

Laura Baldwin - Olympic sailor and two-times Olympic sailing coach. Current National Champion.

Laura believes in the power of sport to unite and excite and sees it playing a crucial role in gaining and maintaining a peaceful global society and happy, healthy communities. Athletes are recognised as being social influencers and role models, ideally placed to inspire the changes we need to make to secure a liveable world. Laura is an environmental activist, or active concerned citizen, motivated by her understanding of the severity of the climate and nature crisis and her deep motherly instincts to protect her child. She is involved in Ocean Rebellion and Extinction Rebellion as a spokesperson and activist. She has used her sporting platform to increase her credibility and reach in communicating about the problems and solutions as well as mentoring and empowering other athletes to find their place in the most critical challenge in the history of humanity.

Dan Reading – Right Formula

Dan is Head of Sustainability at Right Formula where he leads the delivery of sustainability for a range of rights holders and sponsors. Prior to this he was Head of Sustainability at the international federation World Sailing where he developed and managed the sustainability programme. Prior to this, he spent 9 years at the national governing body, the Royal Yachting Association and British Marine (the leisure marine trade association) on a collaborative environmental programme. During his time at the RYA he was seconded to London 2012 where he was the Olympic and Paralympic Sailing Competition Sustainability Manager and was responsible for the first venue in the world being certified to ISO 20121.

Dan has worked across various sports on sustainability strategy and delivery including Formula E teams, Goodwood, Rowing World Cup, Wimbledon hospitality, 6 Day, Powerboat P1, The Ocean Race, America's Cup and others. He is Co-Chair of the UN's Sports for Climate Action Framework, Board Member for British Association for Sustainable Sport, a member of British Triathlon's Sustainability Commission as well as a member of the RNLI's Sustainability Special Interest Group. He is a Chartered Environmentalist, a full member of the Institute of Environmental Management and Assessment and a Certified Marina Professional. Dan won the 2020 inaugural Global Association for International Sport Federation's Sustainability Award and was recently crowned '2021 Environmental

Professional of the Year' by the Society for the Environment.

Phil Horton – Royal Yachting Association

Phil is a Chartered Engineer and started his career working for the BBC. He later studied for an MSc in Environment and Development and moved to the Centre for Alternative Technology in mid Wales, where he worked on sustainable building, renewable energy and water treatment alongside leading the construction of a 2,000m² eco-education centre. After a further 7 years working for a renewable energy co-op, latterly as Managing Director, he decided to change direction and combine his 20 years of work in sustainability with his love of sailing and moved to the Royal Yachting Association as its Environment & Sustainability Manager. In that role he also acts as Environment Secretary for the European Boating Association, and is a member of the BASIS management board.

Hattie Park – The All England Lawn Tennis Club

Hattie Park is the Sustainability Manager at Wimbledon, leading their Environment Positive strategy. She is an environmental sustainability specialist with over ten years' experience developing and delivering corporate sustainability strategies. She joined the AELTC in February 2019 after 9 years as sustainability manager at the BBC. She has an MSc in Environmental Technology from Imperial College London.

Joie Leigh – Birmingham 2022 Commonwealth Games.

Jo is currently a sustainability coordinator at Birmingham 2022 Commonwealth Games, with a particular focus on measuring and managing the carbon impact of the Games. Following previous experience as full-time international hockey player and working for an environmental consultancy, Jo is passionate about the opportunities for sport to lead and champion sustainability

Jess Fidler - Birmingham 2022 Commonwealth Games.

Jess has been at the Games since March 2020 and is currently on a secondment from her role in sustainability at Severn Trent – who are the official Nature and Carbon Neutral supporter of the Games. Jess started her career in Severn Trent and has worked in a variety of climate change focussed roles, ESG reporting and wider sustainability strategy.

Rachel Dulai – British Rowing

Rachel's career started with eleven years in the music industry followed by an excellent grounding in brands and activation at Imagination for five years prior to a freelance career which included the co-creation of the Royal Parks Half Marathon, amongst other events, during which she was introduced to sustainable thinking. Rachel is now in house at British Rowing where she developed the

Power8 Sprints event in Bristol and is currently event director for the World Rowing Coastal Championships and Beach Sprint Finals which will take place in Saundersfoot, Pembrokeshire in October this year.

Amanda Curtis – BASIS Board member and Sustainability Consultant

A leading expert in driving sustainability and creating change, Amanda has over 20 years' experience within sports, events and retail. Amanda is currently delivering the European Equestrian Federation and ATP Tour sustainability programmes. She is a leader in creating and delivering net zero, circular economy and supply chain programmes including for M&S, Coca Cola, Tokyo 2020, Apollo World Music, and was a senior member of the Sustainability team for the London 2012 Games. Amanda is a Board member of BASIS and is an Executive Advisor to the KraftHeinz ESG Board.

Harnessing the **power** of sport
to build a **sustainable** future

Dr Adam Read, SUEZ Recycling and Recovery UK

Dr Adam Read has been External Affairs Director at SUEZ Recycling & Recovery UK for almost 5 years after a successful career in academia, local government and environmental consultancy. For the last 4 years he has co-led the company's work with UK Government on the development of the new Resources & Waste Strategy, including the portfolio of consultations on EPR, DRS and consistent collections. He has worked on resource efficiency and circular economy projects for more than 20 years, as a consultant, client, contractor and community engagement specialist, and is now helping Governments to normalise these activities. Adam sits on numerous industry technical working groups, is a regular speaker and facilitator, a technical report author and a frequent blogger and social media enthusiast. He is a Fellow of the CIWM, the RSA and the Royal Geographical Society and is the CIWM 's 105th President, with his theme for the year 'green skills' and the transition to a circular economy. He has presented evidence to the Environment Audit Committee on green skills and has provided consultation responses to Government on their Net Zero Strategy and agenda for climate change in education. He is a mentor, coach, tutor and guest lecturer committed to inspiring tomorrow's workforce to join the green skills revolution as our next batch of career-focused environmental superheroes.

Kevin Watson- Levy Restaurants UK

Kevin is Business Director & Net Zero Lead for Levy Restaurants UK, after the successful strategic and operational delivery of COP26 Kevin has taken this new role to support the delivery of Levy's Net Zero promise of 2027. Recognised as a strong and motivational leader who is able to build, manage, train and develop high performing teams, Kevin will use this to take a bottom up approach to ensure the education and tools get to the heart of the business.

with families facing food insecurity, diet inequality and isolation.

Recognising the value of food socially, beyond the calories, in 2016 Mark established The Bread and Butter Thing (TBBT). TBBT is a charity that strives to make life more affordable for people by using a community-led food club to build community resilience, partnering with existing community projects and working with service providers to develop wraparound support for the community as a whole. To date, TBBT has 58 hubs across the North of England, over 26,000 registered families and is delivering the equivalent of over 250,000 meals a week. All of the food used is surplus food, intercepted from the food industry and redistributed. TBBT is an award winning model and has been awarded the Queens Award for Voluntary Services, The High Sheriff of Greater Manchester's Community Award, the Food and Drink Federation Community Partner Award 2020 and The Charity Times Charity of the Year and Volunteer Team of the Year 2021.

Mark Game, The Bread and Butter Thing

Mark Game has been a leading light within the surplus food redistribution sector for over 20 years, tirelessly working to rescue and transform edible surplus food for social and environmental purpose, creating innovative and effective solutions both for the food industry and communities on low incomes

Claire Poole – Sport Positive

Claire is the CEO and Founder of Sport Positive, supporting the global sports industry to increase action and ambition on climate change through direct support, community creation, the annual Sport Positive Summit, Sport Positive Leagues and The Climate of Sport podcast.

Sport Positive Summit is the leading global meeting place for sports effecting positive

environmental impacts, in collaboration with UNFCCC Global Climate Action and the International Olympic Committee. Sport Positive Leagues rank and highlight environmental sustainability efforts of top flight sports organisations, to drive industry progress.

Her views and work have been covered by BBC Sport, Sky Sports News, BT Sport, Euronews, The Independent, Reuters, The Times, The New York Times, The Japan Times, Forbes, The Athletic, Rouleur, Euractiv, Ecolospot and more. She is a frequent speaker and chairperson at industry conferences. Additionally Claire is the Principal of ClearBright Consulting; Trustee of UK-based food waste and education charity, UKHarvest; Advisory Board Member for Ecoathletes and The Sport Ecology Group; Advisory Committee Member for The Council for Responsible Sport's Standard for Organisations and IWBI's WELL Advisory on Sports and Entertainment Venues. She is also part of the albert Sports Consortium, for sports broadcasters to tackle their environmental footprint.

Helen Falkus – Sky Sports

Helen Falkus has worked in Sports broadcasting for over 20 years. Beginning her career at production company Sunset and Vine, Helen became a regular covering the Channel4 Cricket and Channel 5 football output. A couple of years at Sky New Zealand followed, before she joined Sky Sports in 2006. Helen has been instrumental in Sky

Sports' award-winning cricket coverage and a pioneer for gender parity in sport leading Sky's role in The Hundred last summer before accepting her new position as Sky Sports Director of Multi Sports. Helen was shortlisted for a WST 'Ambassador for Women's Sport' award in 2018 and is a member of the Sky Sports Content Sustainability group, championing environmental issues within Sky Sports coverage.

Henry Wilks – Shoot the Company

Henry Wilks co-founded film production agency Shoot the Company in 2006. Shoot the Company work with organisations such as FIFA, UEFA, The FA, ECB, CAF, DAZN, McDonald's and Red Bull to make documentaries, TVC's and short form content that focus on the transformational role of sport within communities.

Shoot the Company puts people at the heart of the narrative to bring out complex and critical issues around sustainability, using documentary style filming to show what is actually happening to create films that engage, entertain and educate. We filmed a long running series for UEFA called #EqualGame which tells inspirational stories about players of all abilities and backgrounds in football across Europe. We also produced Outraged, a feature length documentary for UEFA, which takes viewers on a journey across Europe and North America, exploring the complexities of discrimination in the global game, whether based on ethnicity,

gender, religion, sexual orientation or refugee backgrounds. Contributors include Megan Rapinoe, Paul Pogba, José Mourinho, Lucy Bronze, Nadia Nadim and many others. Shoot the Company are official content partner with BASIS and are working with them to create sustainability case studies from their members to showcase best practice and inspire others to take action across the sporting world.

Dave Lockwood – BBC Sport

Dave Lockwood is BBC Sport's first Sustainability Lead. A role responsible for increasing BBC's audiences' engagement and understanding of environmental issues through sport and implementing BBC Sport's own path to net zero. Recent projects include: Publication of Premier League Sustainability Table, collaborating with Wimbledon Championships on their first ever Environment Day and "Sport 2050" which looked at possible climate impacts on sport 3 decades from now, as well as efforts going on in the here and now to avert them. Prior to this Dave has 25 years' experience in the industry, most recently as a Senior Producer with BBC Sport and before that as a Journalist/Producer covering politics and general news for BBC, ITV and Freelance.

Darren Crossman – Principality Stadium and Welsh Rugby Union

Darren is employed as the Facilities and Safety Manager at the Principality Stadium. He has a background in Engineering, Facilities Management, Health and Safety and Sustainability gained over many years. To complement the operational experience he holds, he has studied at both Buckinghamshire New University and Coventry University to gain the academic and theoretical knowledge, achieving both a Bachelor's degree in Crowd Safety Management and a Master's Degree in Crowded Places and Public Safety Management. Darren has been involved in many high-profile events over the years including global mega events such as the Olympic Games 2012, Rugby World Cup 2015, Champions League Final 2017, as well as International Rugby, Six Nations Tournaments, International Football, Concerts, motorsports and exhibitions. Due to his extensive knowledge and expertise Darren has provided support and consultation to Interpol in respect of Project Stadia and Qatar 2022. Darren's unique skill set puts him in a position where he can provide a holistic view and appreciation of any event, venue or infrastructure and provide guidance to ensure a safe and sustainable approach.

Attendee list

Name	Family Name	Job Title	Organisation
Hannah	Amor	Plastics and Sustainability Project Officer	The Environment Agency
Arlette	Anderson	Director of Sustainable Golf	R and A
Andy	Anstey	Commercial Manager	England Athletics
Jack	Baker	Head of Public Policy	LTA
Tom	Baker	Head of Social Impact	UK Sport
Laura	Baldwin	Olympic sailor	Olympic Sailor
Ben	Barrett	Sustainability Consultant	Union Cycliste Internationale (UCI)
Anna	Beeton	Team Coordinator	BASIS
Nick	Birkinshaw	Director	YourPact
Angela	Brown	Group Sustainability & Environment Manager	Freedom Leisure
Prof Mike	Bruford	Dean of Environmental Sustainability	University of Cardiff
Hannah	Buckley	Senior Facilities and Projects Manager	The Football Association
Owen	Burgess	Service Design and Development Lead	Sport Wales
Leigh	Burns	Founder	Lacuna Sports
Caroline	Carlin	Operations and Sustainability Manager	Southampton FC and BASIS Board Member
Evelyn	Carter	Social Impact Manager	UK Sport

British Association for Sustainable Sport

BASIS Venue Performance and Certification

As the sustainability hub for the UK sports sector, BASIS has provided expert support to clubs, venues and governing bodies for well over a decade. We have helped sports organisations to understand their impacts, set targets and implement processes to improve their environmental, economic and social performance. Our goal is to empower and inspire sport in the UK to become a world leader in sustainability. With this in mind BASIS developed its Sustainable Sport Certification Scheme.

The scheme provides a comprehensive review of the sustainability performance of your venue. Developed by experienced sports management professionals, the scheme is based on the twelve [BASIS Sustainable Sport Principles](#) and delves into management practices and policies, assesses performance and gives you a chance to demonstrate innovations and new thinking. The evidence-based approach means that the scheme recognises implemented policies and procedures and rewards actual performance and improvement over time. It is fully compatible with any management approach, including national and international standards or other good practice guidance. Your initial assessment benchmarks your current performance and provides a thorough report and gap analysis, indicating opportunities to improve. Subsequent reviews will demonstrate your positive actions.

The scheme can be used to assess the facilities of community clubs as well as professional venues and has been tested by a range of venues including some of the biggest sports venues in the country. BASIS has assessed sports including football, rugby, cricket, tennis, horse racing and sailing. All can attain recognition for their achievements through the Scheme.

If you want to understand more about the BASIS Sustainable Sport Certification Scheme and get your venue assessed, please email Certification@basis.org.uk for more information.

to build a sustainable future

British Association for Sustainable Sport

BASIS Training Courses

Fundamentals of Sustainability for Sports Organisations

The BASIS Build Back Better consultation identified a knowledge gap on sustainability across sport – a problem for an international industry valued at more than \$500bn facing a global climate crisis. To address this, we have designed a course to help people in sport understand the issues and steer their organisations to a more sustainable footing. More than fifty sports professionals have completed the BASIS Fundamentals of Sustainability for Sports Organisations course.

As a course graduate, you will gain an understanding of environmental, social, economic and political contexts for sustainable development, acquiring frameworks for understanding sustainability and introduce key issues and impacts in the context of sport management. You will be able to identify and define key issues and opportunities in sustainable development and how sport affects, and is affected by, each of these. You will also have an understanding of actions taken by sport organisations that have taken a lead on sustainability. You will understand measurement, management and reporting. And you will be able to translate all this knowledge for, and apply it directly to, your own organisation.

The Programme

Sustainability For Sports Organisations will comprise two-hour online sessions each week for six weeks, totalling 12 hours of Continuing Professional Development (CPD). Relevant guest speakers will join some sessions. Topics covered include:

Sustainability issues – significant sustainability issues will be introduced and discussed in both a global context and as they relate to the sports sector.

Current impacts – global impacts of the climate, ecological and waste crises, how sport is being affected by changing conditions now, and in the future, and how sport can respond.

Definitions and frameworks – sustainable development defined and put into different contexts including practical, political and scientific frameworks and their relevance to sport.

Global to local – how responses can be scaled and made relevant at all levels.

Managing and reporting – what solutions are available? What is the role of international standards and reporting schemes in managing sports events?

Greenwashing – Can sports events ever be truly sustainable? How should sport communicate sustainability performance and what happens when impacts outweigh benefits?

Courses run quarterly with the next course starting in August. The last course of 2022 will start in November. For more information or to register visit <https://basis.org.uk/about/12-principles/training/> or email info@basis.org.uk.

Other training

BASIS is currently developing further courses and modules on each aspect of sustainability as it relates to sport. We will be sure to announce when these are available, but please refer to our website.

BASIS can also provide bespoke sustainability training sessions to your organisation.

For more information on any aspect of BASIS training please email info@basis.org.uk.

British Association for Sustainable Sport

Sport Environment and Climate Coalition statement on climate change and environmental sustainability

Sport, recreation and physical activity is enjoyed by millions of participants and fans across the country from grassroots to the elite, delivering huge social and economic value through improved health and wellbeing, connecting communities and supporting economic growth.

And our natural and built environment provides the places and spaces for people to be active in any way they choose – from pitches, parks, courts and swimming pools to mountains, rivers, coasts and lakes.

But climate change and wider environmental degradation as a result of pollution, biodiversity loss and resource consumption present a clear threat both to our way of life and to our sector.

We therefore need to change the way we operate now to reduce our environmental impact and contribute to wider efforts to reach net zero. And we must take steps to protect the environment within which sport, recreation and physical activity takes place so that our many millions of participants and future generations can continue to enjoy it in the coming decades.

And ultimately the urgency of the task we now face requires leadership – all of us have a role to play in maximising the enormous power and reach of sport, recreation and physical activity to inspire positive environmental and climate action.

In this context, the signatories to this statement have come together to establish a UK-wide, cross-sector approach comprising the following elements:

- **Creation of the Sport Environment and Climate Coalition (SECC) to lead and coordinate the sector's efforts on climate change and environmental sustainability. The group will harness the sector's collective resources to help reduce the environmental impact of sport, recreation and physical activity and contribute to the UK's transition to net zero.**
- **An assessment of the current level of awareness, understanding and action on climate change and environmental sustainability to identify the support needed to help the sector adapt and become more sustainable in the long term.**
- **Development of an ambitious roadmap setting out how the sector will transition to net zero alongside the provision of advice, guidance and support to organisations in the sector to improve their environmental sustainability.**
- **A collective commitment to place tackling inequalities at the heart of the sector's efforts to transition to net zero and become more environmentally sustainable.**
- **Creation of a sector-wide campaign to highlight the importance of climate change and environmental sustainability and leverage the power and reach of sport, recreation and physical activity to drive positive action.**

Achieving our collective ambition on climate change and environmental sustainability will require a collaborative approach and as a group we are committed to working in partnership with our members, partners and government at national and local level to deliver meaningful change.

Members of the Sport Environment and Climate Coalition (SECC) are:
